Slider Memo
the start of our
success story

80 years of experience - for you to benefit from

Eight decades of accumulated knowledge is quite a considerable achievement. "But what good is it to me?" you may well be asking yourself. Well the answer is: it gives you the certainty that you are offering your customers writing instruments that will satisfy them in all everyday situations - and they will thank you for it. Please allow me to present a brief overview of our activities:

Germany's first producer of ballpoint pen refills
Not long after the war, the Schneider brothers (one of whom was my grandfather) began to build on the experience they had made in precision metal working to improve and ultimately produce a new article - the ballpoint pen refill. They went on to develop this new writing implement into a brand article in Germany, and by the 1950s, Schneider ballpoint pen refills had already become legendary.

The absolute classic
Based on this experience, we went on to produce all the other things that are needed to make up a pen - and this is what made us what we are today - the number one in Germany for brand-name ballpoint pens. This is already evident from the classic of all the classics - the K 15, which even on Wikipedia is seen as the epitome of the ballpoint pen on an international level. Thanks to its simplicity and reliability, it can be found in its millions in hotel receptions, medical practices, shop counters, offices and homes. It remains the best-selling ballpoint pen in Germany!

Gala of the super-performers
Another item that enjoys similar cult status is the Loox, with its rubberised grip zone, the Klick-Fix-Pen with the clip and coil cord, the hero when it comes to lists and notices, the Base fountain pen, and now also the Slider series of ballpoint pens with the smooth gliding action, which have written a remarkable success story since their market launch in 2007 – with sales still continuing to rise.

We never rest
You can rely on Schneider – and we know that we can rely on you.
All of these successes are for good reason - they are largely due to your commitment. And this is why we do so much to support you, for instance by systematically expanding our range of contemporary pens to serve growing demand, or with our varied sales promotion campaigns, as described on pages 6–7.

A major new talent is rising
Or with the launch of the Ray - a new fountain pen whose modern design has everything that it takes to become a major success. It might even match the recent success of the One rollerball, and we have dedicated the final double page in this catalogue to it.

So it only remains for me to wish you entertaining reading, and I am sure that you will find plenty to interest both yourself and your customers.

Best wishes

Christian Schneider

Christian Schneider
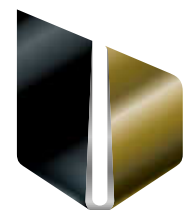

german brand award '17 winner

The German Brand Award is presented by the German Design Council for outstanding brand management. We are proud of this award, because we know that a strong brand is the most sustainable sales promotion.

20 years of EMAS certification

2018 is not only the year in which we will celebrate our eightieth birthday, but it also marks a smaller anniversary, as it will be twenty years since we were first awarded EMAS certification. Actually, it isn't such a small matter at all. Indeed, not only were we the first company in our industry to subject itself to this demanding worldwide test, but we remained the only one to do so for the next ten years. We managed it, because we have consistently devoted our attention to environmental matters, even since well before 1998, the year in which our involvement earned its official visible recognition in the form of the EMAS certification.

So what does this mean exactly? It means that we make constant and concerted efforts to improve our environmental performance in all areas and that we are able to verify our actions. This is why our EMAS certificate is regularly validated in accordance with the regulations.

Our original six-point programme for sustainable and environmentally friendly production (see pictograms) has long been augmented by a number of additional aspects, such as the increasing use of biobased plastic, the climate-neutral production of many of our articles, purchasing power-saving machinery, procuring materials from local suppliers wherever possible, making packaging from 80% recycled paper, avoiding airplane journeys, and using e-bikes to travel to work.

Our Sustainability Report provides information on all of these activities, and it also contains our Environmental Declaration pursuant to EMAS guidelines; it can be found on our website in the »We Care« menu.

Recycling of product components

Electricity is 100% from water-power / regenerative energy

Reducing CO_2 emissions

Developed and produced in Germany

Reduction of emissions and waste

Long lasting, sustainable products

A love letter to nature

Dear Planet Earth,
I love your water, your forests, your lakes, your mountains, your sun, and your people.
I hope you take good care of yourself!

♡ Yours, Julia*

We Care

We don't just say that we care, but we also care in our hearts. A list of our measures is given on the left, so to find out more about them, just go to www.schneiderpen.com/we-care. But there is more to it than that. Maybe it is because we feel our roots in the Black Forest and Harz that we have a distinct appreciation of nature and its beauty, and for the need to preserve it for generations to come. Everything we do is based on this fundamental attitude.

We Care

* Received from a participant in our campaign at the Paperworld 2017.

Our all-stars
An international
presence

Popularity doesn't just happen – as every pop star knows. You have to get close to your fans, and the best way to reach them is to go on stage. This is why our agents organise appearances at trade fairs, universities and railways stations, on billboards, buses and trains, in shopping centres, stationery stores and so on and so forth – and have done so for many years. 2017 was a particularly intense year, and here are some of the highlights:

Sought after in more than

130

countries

Line-Up – under the spotlight
The name says it all: this one belongs on the stage. As the first fineliner with a barrel made of bio-based plastic, and available in 30 colours, the Line-Up is our ultimate high-flyer.
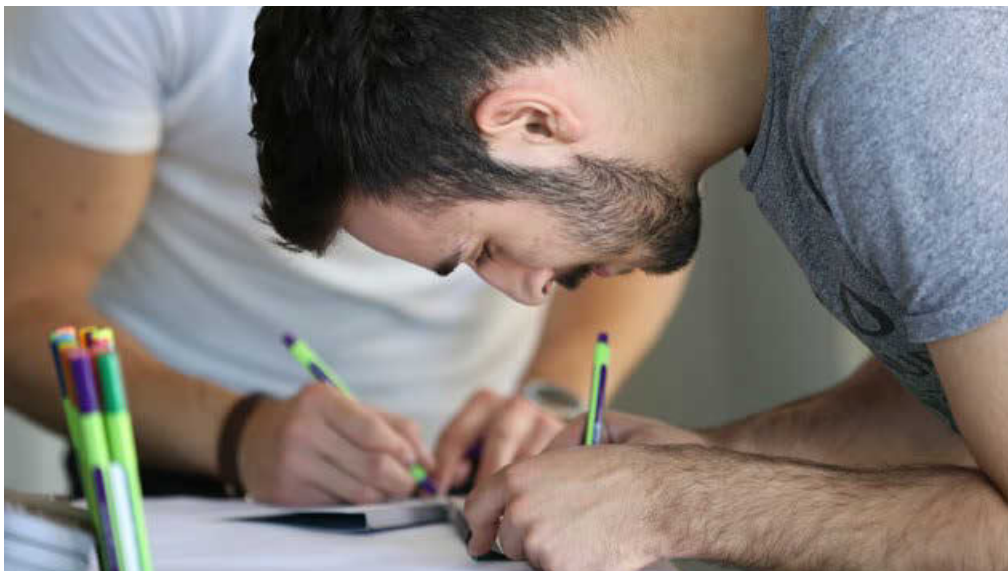

One Business – the Rocking Rollerball

The One Business is known for its ultimate writing sensation, thanks to its ultra-smooth tip. So we gave it a highly emotional launch in 2016 – as a successful business rockstar.

Link-It – it just clicked

The fact that an analogue pen has become the symbol for a link in this digital age is quite something. Link-It pens are available as fineliners and fibrepens, in 16 great colours – and an amazing 496 combinations are possible. The playful concept was an immediate success with children and schoolchildren.
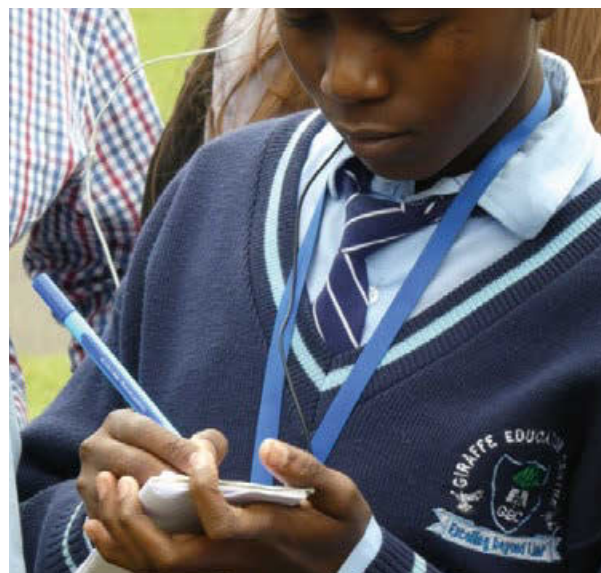

The Slider series – surfing on the wave of success

Our agents convey the outstanding quality of our pens to their listeners with passion and enthusiasm. And whatever the culture, they can be sure of a big round of applause for our 'Made in Germany' products.

Ballpoint Pens

Schneider ballpoint pens are designed for everyday use. Functional design, high quality and a long shelf life are especially important to us. Some examples: Plug+Play, the universal fit for different refill formats makes refilling easy. A rotation mechanism rotates the refill by 45 degrees with each click, so that the tip is being used evenly on all sides. Wear-resistant stainless steel tips guarantee that the big ink reservoir can be used up completely without any smear marks. Schneider ballpoint pens have thus become a leading brand worldwide.

Slider is the new innovative ballpoint pen with Viscoglide® technology for extraordinarily easy and gliding writing. Other smooth writing instruments cannot meet the shelf life and easy handling of the Slider ballpoint pen. The writing dries quickly - even on smooth paper – and is smudge proof when highlighting it later on.

Slider Xite

· Ballpoint pen with pen body made of 90% biobased plastics
· Viscoglide® technology for extraordinarily easy and gliding writing
· Replaceable metal refill Slider 710 XB with wear-resistant stainless steel tip
· Ink color recognisable at the push button
· Waterproof according to ink standard ISO 12757-2 (except red)
· Replaceable with any of the other Plug+Play refills

Fountain Pens and Cartridge Rollerballs

Writing by hand is a trend that runs counter to digital communication. In the creative scene, calligraphy and hand lettering play a prominent role, but in everyday situations too, handwriting is best when it looks good. It must be easy to interpret, which involves a good degree of rhythm and uniformity. It is also more personal and friendlier to write postcards, invitations, salutations, addresses and senders' names by hand. Whether or not this succeeds is essentially down to the writing instrument used.

Schneider offers a range of fountain and cartridge rollerballs with excellent characteristics for precisely this purpose. The foundations are laid when we learn to write - the best way of creating uniform letter shapes is with fountain pen and ink. The ergonomic shape helps to avoid cramp and fatigue. And experienced writers appreciate fountain pens, as the strokes they produce appear more lively. Cartridge rollerballs are somewhat less demanding in use and are frequently used as an alternative to fountain pens.

Base Senso

· Cartridge rollerball with warning light at the end of the pen
· Indicates when too much writing pressure is exerted
· Ideal for beginners and for people with motoric difficulties
· Ergonomically shaped grip
· Replaceable rollerball cartridge 852 with ball tip
· Ink colour royal blue, erasable
· Ink dries quickly and is smudge proof when highlighting it
  later on
· Large finger areas avoid pressure points
· Rubberised for elasticity and to prevent slipping

Rollerballs

Liquid ink is something that we have all been familiar with since we first started learning to write. Rollerballs come with a variety of tips and ink formulations which not only serve specific purposes with different line thicknesses but are also decisive for writing comfort. The ultra-smooth tip offers the best user sensation for promoting fast and efficient writing. Other highlights are the patented hybrid tips with sheath and ball mounting made of wear-resistant stainless steel. The ball is mounted elastically on a plastic bearing, which makes the rolling motion particularly smooth and pleasant.

The "One" series is set to be the next generation of rollerballs. Its Super-Flow-System ensures a consistent flow of ink from start to finish. The ink is stored in the tank in liquid form. This enables a high filling capacity with nothing remaining behind in the fibres. A regulating system balances out deviations in temperature and air pressure and also protects the pen against leakage.

One Business

· Rollerball with ultra-smooth tip for the best writing
  experience
· Line width approx. 0.6 mm
· Waterproof according to ink standard ISO 14145-2
· Super-Flow-System for consistent ink flow
· Large ink reservoir with level indicator
· Cap-off ink does not run dry even if the cap is removed for
  2-3 days
· Ergonomically rubberised surface

Fineliners and Fibrepens

Their outstanding qualities have established Schneider fineliners and fibrepens as firm favourites in terms of meeting day-to-day writing needs. The ink, reservoir and tip are perfectly matched physically so as to create an even stroke. The fine tips are stabilised with a stainless steel tube which also allows the pens to be used with rulers and stencils.

The Line-Up and Link-It series set milestones in terms of further development. The enormous range of colours makes for even more varied range of applications, as does the possibility of combining different tips and colours in the Link-It series. Pencil case stands with fold-up lids are a convenient way to keep everything tidily in place. The casings made of biobased plastic are a new feature: they save finite resources and improve the CO_2 footprint.

Link-It

· Click! The first modular system that cleverly links two pens
· Fineliner = line width 0.4 mm, fibrepen = line width 1.0 mm
· Ideal for writing, painting, collecting and swapping
· Pen body made from 88 % biobased plastic
· Cap-off ink does not run dry even if the cap is removed for 2-3 days
· Individual or linked - the slim design fits in each pencil case
· Slip-proof thanks to the rubberised three-edged design
· Can be held comfortably as individual pen as the cap fits on the end of the barrel

Bio Pen body made of > 85% biobased plastic

Markers

Schneider offers solutions for all kinds of applications: highlighters, permanent markers, combined markers for whiteboards and flipcharts, universal permanent and non-permanent markers, paint markers, chalk markers and more. All of them in different colours and line widths. The best quality for the application, safety of the inks used and the protection of resources are prime objectives of development. There are easy refill systems available for almost all markers.

Major improvements were achieved with the combined markers for whiteboards and flipcharts. More ink increases the output and creates more visibility. Yet the combined marker works without limitations - writing can be erased from whiteboards without residue and on flipcharts the ink does not seep through the pages underneath. The highlighter Job combines high performance with beauty. In 2013 its contemporary clear and minimalist design was awarded the prestigious iF and reddot design awards.

Job

· Smart highlighter for brilliant results
· Chisel tip for line widths 1+5 mm
· Universal ink for standard, copy and fax paper
· Intensive colours, light-resistant ink
· Refillable with Maxx 660 refill station
· Barrel parts made from anti-evaporation PP for long-term shelf-life
· Cap with practical clip
· Awarded the iF and reddot design award

This overview provides a rough collection of properties and applications of our markers. In individual cases we cannot guarantee the accuracy of promised features, since many of the technical parameters are beyond our control. For special applications that do not meet the standard according to usage (eg office, school, home, hobby), please ask for the most appropriate solution. In principle, for a good grip on (smooth) surfaces, a clean dry surface is necessary.

● Suitable   ● Suitable to only a limited extent

Graffix

· Mechanical pencil with cylindrical lead tube
· Line widths 0.3, 0.5 and 0.7 mm with ISO colour code
· Tube 0.5 and 0.7 mm is retractable
· Extra large eraser under the push-button
· With rubberised grip zone
· Metal clip and tip

Signs and Symbols

Cap-off
Can be kept open for 2 to 3 days without drying up.

For Documents
The writing is permanent according to ISO standards for "documentary use".

Refillable
The pens can be refilled with refills, cartridges or reservoirs.

Refillable with Plug+Play
Ballpoint pens and refills with this symbol are compatible to each other.

Water and light resistant
The writing doesn't dissolve in water and remains visible after UV radiation.

Triangular shape
Defines exact position for each finger.

Stylus-pen
With soft touch tip to operate on tablets and smartphones.

CO_2 neutral
Schneider offsets unavoidable emissions caused by supporting a certified and ecologically sustainable climate protection project.

Further information can be found at Climatepartner.com

Bio
Pen body with this symbol are made of biobased plastic.

Marker with liner tip	Refill with needle tip	Rollerball with plastic conus tip

Ray, the ink performer: a new charismatic hero

Advanced and elliptical, with a touch of technology and a design that is both sporty and classic. The colour combinations white and anthracite or dark blue and light grey are pure style, and the combination of matt-rubberised and glossy-smooth surfaces merges functionality with tactile aesthetics.

The conditions are just right for a lightning start, and it is clearly no coincidence that »Ray« is not just a great name but also a word that directly evokes radiance.

The benefits of this fountain pen's design are obvious, especially when you hold it in your hand. It is more than just a pen for children but appeals to a broad group of people.

Schoolchildren on the lookout for a cool writing instrument will love it. Which is why the Ray is about to become the figurehead of the »Got it!« campaign in the school and youth category.

The fountain pen is becoming an object of appreciation again, because attractive handwriting is now being rediscovered as a special skill that you do not see every day.

For students and adults who continue to appreciate the benefits of writing with a fountain pen, the Ray represents a perfect alternative that is as far removed from school-day associations as it is from luxury lifestyle.

The high-quality stainless-steel tip with the iridium nib complete the picture. The Ray is also available as a matching cartridge pen.
